Objective

Highly motivated and detail-driven individual seeking to leverage mathematical and programming skills to excel in the Artificial Intelligence and Machine Learning course. Eager to gain a deep understanding of AI and ML fundamentals, including supervised and unsupervised learning, neural networks, and natural language processing. Aim to develop expertise in building intelligent systems that drive innovation and solve complex problems. Looking to expand knowledge and skills to pursue a career in AI research, data science, or related fields, and contribute to the development of cutting-edge AI solutions."

Experience

• Codea software house

11-1-2024 - 11-2-2024

Internship (unpaid)

- Utilized HTML, CSS, JavaScript, and frameworks to develop responsive UI components
- Collaborated with teams to implement features, troubleshoot, and debug code
- Gained hands-on experience with version control systems and agile development methodologies

Education

• Education:

- Bachelor of Science in Computer Science, Islamia University of Bahawalpur (4th semester completed, expected graduation 2026)
- ICS (Intermediate in Computer Science), Govt. Graduate College Bahawalpur (2022)

Skills

- Programming Languages: - Python: Advanced programming skills in Python, including data structures, algorithms, and object-oriented programming
- Machine Learning Techniques: - *Supervised Learning:* Skilled in implementing supervised learning algorithms, including: - Regression (Linear, Ridge, Lasso) - Classification (Logistic Regression, Decision Trees, Random Forest) - Support Vector Machines (SVM) - *Unsupervised Learning:* Experienced in implementing unsupervised learning algorithms, including: - Clustering (K-Means, Hierarchical Clustering) - Dimensionality Reduction (PCA, t-SNE) - Density Estimation (KDE)
- Machine Learning Libraries: - NumPy: Proficient in using NumPy for efficient numerical computations and data manipulation. - Pandas: Skilled in using Pandas for data manipulation, analysis, and visualization. - Matplotlib: Experienced in using Matplotlib for creating high-quality data visualizations. - Seaborn: Proficient in using Seaborn for creating informative and attractive statistical graphics. - Scikit-learn: Expertise in using Scikit-learn for implementing machine learning algorithms, including supervised and unsupervised learning techniques.
- Additional Skills: - Data preprocessing and feature engineering - Model evaluation and selection - Hyperparameter tuning and optimization - Experience with large datasets and big data technologies

Projects

• Library Management System(<https://github.com/shani729/Library-Mangement-System>)

Python, MySQL, Tkinter

- Features: Book cataloging, Member management, Borrowing & return tracking, Fine calculation
- Technologies: Python, MySQL, Tkinter

• E-commerce website(<https://github.com/shani729/E-commerce-Website>)

Built with HTML, CSS, JavaScript

- Features: User Registration, Product Catalog, Shopping Cart, Secure Checkout
- Functionalities: Filtering, Sorting, Real-time Updates, Responsive Design
- Technologies: HTML (structure), CSS (styling), JavaScript (interactions)

• EDA Data Analysis

Used Python, Pandas, NumPy, Matplotlib, Seaborn for in-depth analysis

- Activities: Data cleaning, visualization, pattern identification
- Techniques: Data manipulation, summary stats, visualization, correlation analysis

Soft Skills

- - Communication & Collaboration
- Problem-solving & Adaptability
- Continuous Learning & Time Management
- Data-Driven Decision Making & Creativity
- Critical Thinking

Languages

- English (Intermediate)
- Urdu(Fluent)
